Subject: Database Search Request Confirmation, Serial Number: 10/506,880

Examiner HELEN PEZZUTO:

This is a machine-generated confirmation email to let you know that your search request has been sent to EIC TC1700.

Searches are processed in the order in which they are received. Upon receiving your request, a searcher will contact you to discuss your search. You will be notified again when your search is completed. At that time, you may pick up your search in the EIC. If you prefer, the search will be delivered directly to your office. Deliveries are made twice a day, once in the midmorning and again in the afternoon.

If you have any immediate questions you can contact us at 571-272-2530.

Thank you very much for using the EIC. The text of your request is below.

Your name: **HELEN PEZZUTO**
Email address: **HELEN.PEZZUTO@USPTO.GOV**
Employee number: **70058**
Art Unit: **GROUP ART UNIT 1713**
Office Location: **REM 10A11**
Phone Number: **(571)272-1108**
Mailbox Number:

Case serial number: **10/506,880**
Class / Subclass(es): **521/25+**
Earliest Priority Filing Date: **3/5/02**
Format preferred for results: **E-mail**
Search Topic Information:

Claims 13-16, and 18-22 are elected and under consideration. (This is related to 10/506,622 and 10/506,387 submitted earlier). A membrane "made by a process" of "expanding" (i.e. by soaking or inserting the film in the liquid) a polymer film with a liquid of vinylphosphonic acid (claim 16), and subsequently polymerize (claim 19) the vinylphosphonic acid to harden the film. Note that the polymerization step (c) is not currently recited in claim 13 but is contemplated in claim 19 and the specification. The elected polymer species is the first benzimidazole polymer on page 17. Platinum is the elected catalytically active component (claim 22). Many thanks!

Special Instructions and Other Comments:

Please give search request to Ms. K. Fuller. Many thanks!
